PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, Data Engineering for AI, CGPA 8.45/10) with hands-on experience designing multi-agent automation pipelines and orchestrating AI-driven workflows using N8N. Practical experience building agent-to-agent coordination logic across multi-agent systems (4-7 specialized agents) for data analysis, fraud detection, and voice-assistant use cases. Comfortable integrating LLM APIs (OpenAI, Claude, Gemini) into automated pipelines and designing REST APIs connecting automation outputs to downstream applications. Experience with rule-based pipeline design and evaluation frameworks for automation reliability (precision/recall/F1, weighted scoring). Seeking an AI Automation Engineer role to design and scale intelligent, agent-driven workflows.
